\$500

One-time licence

Per location, yours to keep

INTERNET DOWN? KEEP SELLING

Takes orders offline

The POS runs on the tablet, so a dropped connection doesn't stop service.

- Ring up orders and open tabs
- Print receipts and kitchen and bar tickets
- Open the drawer and take cash
- Everything syncs when the connection is back

Kitchen screens and QR ordering need the internet.

\$0 FEES WITH CASH DISCOUNT

Cards, even when you're offline

Pair a \$59 Square Reader to the tablet and take cards right at the POS.

- Tap, chip, Apple Pay and Google Pay
- Tip on screen, paid straight onto the tab
- Offline mode keeps taking cards; they go through when you're back online
- A reader per server for pay-at-table

Offline cards need Square's offline mode on your account and upload within 24 hours.

POOL, SNOOKER & DARTS

Table lights that run the clock

Turn a table's light on and its time starts. Turn it off and the time goes on the tab at that table's rate.

- Switch lights from the POS, the website or the wall
- Pause turns the light off, resume turns it back on
- Alerts for a light on with no tab
- Works with Shelly and Tapo switches (options overleaf)

Offline, the wall switch still works and staff start and stop time on the POS.

ALSO INCLUDED

Everything a busy counter needs

- **Tabs and table service.** Open and move tabs, move items between tabs, or split the bill evenly.
- **Floor plan.** Every table at a glance, colour-coded by status.
- **QR table ordering.** Guests order from their phone; it lands on the right tab.
- **Staff PINs and time clock.** Roles, manager approvals, voids and clock-in.
- **Stock and reports.** Live stock counts, low-stock alerts, daily takings, tips and CSV exports.
- **Your language.** English, Chinese, French and Polish, chosen per tablet.

How the cash discount program works

Your menu shows the cash price. Card customers pay the posted card price, set a few percent higher, and that difference covers the processing cost. Both prices appear on screen and on the receipt.

Burger, cash

WHAT YOU BUY

Hardware, at today's online prices

ITEM	SUGGESTED MODEL	EST. PRICE
REQUIRED, ONE OF EACH		
Android tablet	Samsung Galaxy Tab A9+ 11", 128 GB Any Android 9+ tablet works	\$230
Receipt printer	Epson TM-T88V, Ethernet (M244A) About \$140 refurbished	\$275
Card reader	Square Reader, contactless + chip (2nd gen) Tap, chip, Apple Pay, Google Pay	\$59
Cash drawer	16" printer-driven drawer, RJ12 Opens from the receipt printer	\$75
Hardware subtotal		\$639

ADD-ONS, IF YOU NEED THEM

Kitchen printer	Epson TM-U220B impact, Ethernet Handles kitchen heat and grease	\$390
Bar printer	Epson TM-T20III thermal, Ethernet	\$275
Extra tablet	Second station or server tablet	\$230
Extra card reader	One per server for pay-at-table	\$59

Estimates from US retailers (Amazon, Best Buy, Walmart, POS dealers), October 2026, before tax and shipping. Prices change; we'll quote current prices when you order. Printers connect by network cable to your router.

TYPICAL FIRST-YEAR COST, ABOUT

Counter

Coffee bar, food truck, small café

\$1,150

About \$650 hardware + \$500 licence

Restaurant

Counter plus a kitchen printer

\$1,550

About \$1,050 hardware + \$500 licence

Restaurant & bar

Kitchen and bar printers

\$1,800

About \$1,300 hardware + \$500 licence

Pool hall, 8 tables

Counter plus eight Shelly 1PM light modules

\$1,350

About \$850 hardware + \$500 licence, plus the electrician

Then \$0 a month. No contract. Add about \$25 a table for light control.

TABLE LIGHTS, OPTIONAL

Light control modules

MODULE	BEST FOR	EST. PRICE
SHELLY (RECOMMENDED)		
Shelly 1PM Gen3 One table	One module per table. Fits in the box behind the existing wall switch, which keeps working; measures power	\$25
ALSO WORKS: TP-LINK TAPO		
Tapo S505 One table	Smart wall switch that replaces the existing switch	\$25
Tapo P125M One table	Smart plug, for table lights that plug in	\$20

Shelly links through Shelly Cloud, so nothing else is needed on site. Tapo needs a computer or CueSportAi box at the club running our free light agent. Every module keeps its wall switch working without the internet. In-wall modules are installed by a licensed electrician.

Card payments are processed by Square. Under the cash discount program the card price covers the processing cost, so the merchant pays no net processing fee; the price shown is the price charged. Cash discount rules vary by state; we set up your pricing, signs and receipts with you.
